

Metaverse on-demand business that integrates virtual and reality based on Kron Computing's technological infrastructure

Aiming for a consumer-based infrastructure service solution differentiated from the existing blockchain and platform services that were focused only on technology implementation

## Technical background and efficiency of optimal OWAKE implementation through the OWAKE framework layer

### OWAKE FRAMEWORK LAYERING

**PHASE 2**  
**23rd June 2022**

1. Proof of Real time communication.
2. Proof of kron delivery content and verification of the identity of the file.
3. Functionalities added: pdf sharing, video/audio/image content sharing, Audio(Music) Broadcasting, website real sharing, whiteboard, chat, screen sharing, Video/Audio streaming
4. PDL integration in Hyperledger Fabric.
